Computer Science engineer | Python Developer | AI/ML & Cyber Security Enthusiast GitHub: https://github.com/22becse46

PROFESSIONAL SUMMARY

Motivated Computer Science Engineer with strong skills in Python, SQL, APIs, Data Structures & Algorithms, and backend development fundamentals. Experienced in building machine learning systems, analytics dashboards, automation projects, and secure software solutions using Python, REST APIs, Pandas, NumPy, PyTorch, and OpenCV. Passionate about scalable software development, debugging, problem-solving, and real-world application development.

TECHNICAL SKILLS

- Python, C++, C, SQL
- Flask, REST API Basics, Pandas, NumPy, PyTorch, OpenCV
- Data Structures & Algorithms, OOPs, DBMS, APIs, Debugging, Problem Solving
- Git, GitHub, Power BI, MongoDB, MS Excel
- HTML, CSS, Basic Frontend Development

EDUCATION

Central University of Jammu

Bachelor of Technology (BTech) – Computer Science & Engineering

2022 – 2026

INTERNSHIP EXPERIENCE

Cyber Cell Jammu — Cyber Security Intern

- Supported cybercrime investigation workflows involving digital evidence handling and cyber fraud analysis.
- Assisted in technical documentation, investigation support activities, and cybersecurity awareness procedures.
- Worked with data organization and secure information handling practices.

Web Development Intern

- Assisted in frontend website development and responsive UI implementation.
- Worked on webpage design, debugging, and user interface improvements using HTML and CSS.
- Collaborated on website optimization and basic functionality enhancement tasks.

PROJECTS

REST API-Based Student Management System

- Developing a REST API-based student management system using Python, Flask, and SQL with CRUD operations and API authentication.
- Implementing database integration, JSON handling, debugging, and backend testing using Postman and GitHub.

Enhancing Biometric Template Through Cancellable Finger Vein Biometric System

- Developed a secure biometric authentication system using Python, PyTorch, and OpenCV with deep learning-based feature extraction.
- Achieved 98.73% authentication accuracy using Swin Transformer, GNN, and cancellable biometric security techniques.

Integrated Search & Record System (ISRS)

- Developed a centralized record management system using Python and SQL for efficient data storage, retrieval, and search optimization.
- Improved accessibility and secure handling of organized records through structured database operations.

Smart Kisan Radio System (Smart KISHAN)

- Designed an AI-powered voice-based agricultural assistant for rural environments using NLP, APIs, and multilingual interaction workflows.
- Integrated weather, mandi price, and advisory datasets to provide intelligent farming decision support.
- Focused on offline AI capabilities, explainable AI, and localized communication for rural accessibility.

AI-Based Phishing Detection & Cyber Threat Analyzer (MAKE SURE)

- Developing an AI-powered phishing detection and cyber threat analysis system using Python and machine learning techniques.
- Implementing URL analysis, Domain scan, File scan suspicious email detection, threat classification, and real-time alert mechanisms using APIs and threat intelligence datasets.

NLP-Based Grammar Correction System

- Developed an NLP-based grammar correction application using Python with text preprocessing and automated correction workflows.
- Implemented tokenization, normalization, and rule-based language correction techniques to improve text readability.

CERTIFICATIONS

- MongoDB Certification
- AI & GPT Certification
- Power BI Certification
- Web Development Certification
- Cyber Cell Jammu Certification
- Soft Skills & Personality Development – IIT Kanpur (Silver Medal, 2025)

LANGUAGE

English | Hindi

ACHIEVEMENTS

- Silver Medal – Soft Skills & Personality Development Program, IIT Kanpur (2025)
- Bronze Medal – Javelin Throw (2 Times)
- Bronze Medal – 100m Race
- 6th Position – Marathon
